

Build a wash station: Table top – large upright

You will need:

Pallet wood

5ℓ bottle

Small coke bottle

Large diameter click top to match 5ℓ bottle

Small 5ℓ bucket

Soap mixture:
2 tablespoons soap
and 5ℓ water

Build & assemble:

- 1 Build a frame as indicated, with a box at the bottom to fit the bucket, with a cross bar with a hole to support the bottle

- 2 Create a hole in the base of the bottle and attach the coke bottle to form a funnel to fill the bottle; fix the click cap to the neck of the bottle

- 3 Detail of shaped hole in cross bar to receive the shaped neck of the bottle

- 4 Detail of support at top of frame around the neck of the coke bottle forming the funnel

- 5 Insert the bottle through the frame and attach the supports at the top of the frame

- 6 Place bucket under the stand, fill the bottle with the soapy water mix (as above) and you are ready to wash your hands

Remember to wash your hands for at least 20 seconds!
